

Design gap analysis — missing pages & screens

Current Figma set checked against the PRD page inventory (§6.4) and Stage-1 components S1–S15. Grouped by build impact; **MUST** = required for go-live.

DEVELOPER / DELIVERY

INPUT TO SPRINT-1 AUDIT (S15)

REF CAL-GP-2026-001

SUPERSEDES
Iterations 1–2
Latest: Desktop + Mobile

This is the gap list between the **designed** screens and the **scoped** screens. Section A is what exists; B–E are what's missing (public, system, admin, states); F are reconciliation items for the Sprint-1 design audit that owns the signed page inventory.

A Pages present (designed)

mapped to PRD components

- ✓ Home – Win / Award (S1)
- ✓ Advisory Services – Win / Award
- ✓ Our Expertise / About (S7)
- ✓ Insights — article listing (S2)
- ✓ Courses – All (S4)
- ✓ Courses – Individual (S4)
- ✓ Forum Home / Categories / Article / Submit (S5–S6)
- ✓ Contact Us (S8)
- ✓ Tenders – Global / Australia (S9)
- ✓ Navbars — desktop + mobile
- ✓ Mobile versions of most public pages

Source of truth: the Oct 2025 **Desktop** + **Mobile** sets. Iterations 1–2 are superseded drafts.

B Public pages missing

- ☐ **Article (Insight) detail template** S2 **MUST**
Listing exists, but no single-article page: hero, rich body, author, dates, related articles, breadcrumbs, share, in-article subscribe CTA.
- ☐ **Videos library page** S3 **MUST**
Facade grid with platform + category filters and pagination. Not designed and not in the deck's screen list — needs a decision and a design.
- ☐ **Search results view** S2/S5 **CONFIRM**
Search is scoped for Articles and Q&A; confirm whether results are inline or a dedicated page.
- ☐ **Book a Consultation flow** **CONFIRM**
Listed as a screen; confirm whether it's a distinct step or simply routes into Contact Us.

C System / utility pages missing

☐ **Privacy Policy** SF-09 LEGAL
Privacy Act 1988 / APPs. Required at every collection point.

☐ **Terms of Use** SF-09 MUST

☐ **Cookie consent banner** S12 MUST
Wired to Consent Mode v2; gates pixel firing.

☐ **Subscribe confirmation / double opt-in landing** S11

☐ **Unsubscribe confirmation** S11

☐ **404 page** SF-10 MUST

☐ **500 page** SF-10

☐ **Form success / confirmation states** SF-10
Question submitted, register-interest, contact sent.

D Admin / CMS screens missing

entire set — none designed

☐ **Login · Forgot / reset password** SF-01

☐ **Dashboard** SF-03
Pending questions, recent subscribers, content stats, quick actions.

☐ **Articles list + rich-text editor**

☐ **Videos list + bulk import**

☐ **Courses list + editor**

☐ **Q&A moderation queue + answer / publish workflow** S5/S6 MUST
The workflow-state UI: Submitted → In Review → Approved → Published / Rejected.

☐ **Subscribers view + export**

☐ **Links manager (tender + social)**

☐ **Pages editor (About + legal)**

☐ **Media library** SF-04

☐ **Users & roles (RBAC)** SF-02
Super Admin / Editor / Moderator matrix; T2 roles reserved.

☐ **Settings (SEO defaults, email, redirects) + audit log**

Decision needed: bespoke Figma for admin, or build to functional admin templates? The PRD permits templates for non-brand gaps — but this must be agreed, since self-service admin is core Stage-1 scope.

E States & edge cases missing

across existing pages

☐ Empty states SF-10

No-results on Insights, Courses, Forum and Videos filters.

☐ Loading states

☐ Error / form-validation states

☐ Course 'Coming soon' vs 'Open' states S4

☐ Homepage rail fallbacks

Confirm featured-rail fallbacks, and whether a video rail is expected (ties to the Videos-page decision).

F Design-audit reconciliation notes

Sprint-1, S15

☐ Videos scope vs design mismatch MUST

S3 (Videos) is a MUST component with no design and is absent from the 18-screen deck list. Resolve with the client before build.

☐ Advisory Services not an S-component

The two Advisory Services pages exist in design but aren't a named component in the PRD — map to scope or log.

☐ Breadcrumbs

FR-38 requires breadcrumbs on all interior pages; not evident in current frames — confirm in audit.

☐ Signed page inventory at M1

Reconcile the deck's 18 screens against the full PRD §6.4 inventory and produce the signed inventory + gap list by end of Week 1.
