

Government Procurement – Staging Delivery Set

Scope reference	CAL-GP-2026-SCOPE-004
Environment	Staging — https://staging.govprocurement.com.au
Prepared	28 August 2026
Branch	<code>feature/lms-sign-off</code>

⚠ This document contains live sign-in credentials. They work on the staging site right now. Share it only with people who should have access, and rotate every password below before any of these accounts are used in production.

Everything needed to sign in to the staging environment and walk the learning platform end to end — three accounts, a fully built course, and the flows worth testing before this goes to production.

Every link below was opened and confirmed to render on 28 August 2026.

1. Where everything lives

One deployment serves the public site, the learning platform and the CMS. Which one you land in is decided by the role on your account, not by the address you sign in at.

SURFACE	LINK	WHO IT IS FOR
Public site	https://staging.govprocurement.com.au/	Anyone. Marketing pages.
Public course listing	https://staging.govprocurement.com.au/courses	Anyone. The marketing view of the catalogue.
Learner sign-in	https://staging.govprocurement.com.au/learn/login	Students and instructors. Staff may also use this — they are redirected to the CMS.
CMS sign-in	https://staging.govprocurement.com.au/admin/login	Administrators. The direct route into the back office.
Create an account	https://staging.govprocurement.com.au/learn/signup	New students and instructors.
Course catalogue (in-app)	https://staging.govprocurement.com.au/learn/courses	Courses and bundles, with prices.

2. Accounts

Three accounts, one per role. Each was signed in on the staging site on 28 August to confirm it works and lands where it should.

2.1 ADMINISTRATOR

Sign in at	https://staging.govprocurement.com.au/admin/login
------------	---

Email	admin@govprocurement.com.au
-------	-----------------------------

Password	GAdmin!Delivery26
----------	-------------------

Lands on	https://staging.govprocurement.com.au/admin
----------	---

Can do everything: approve courses, manage users and roles, edit the public site, view orders.

Useful destinations:

- Dashboard — <https://staging.govprocurement.com.au/admin>
- Courses (including the approval queue) — <https://staging.govprocurement.com.au/admin/courses>
- Users & roles — <https://staging.govprocurement.com.au/admin/users>
- Media library — <https://staging.govprocurement.com.au/admin/media>

2.2 INSTRUCTOR

Sign in at	https://staging.govprocurement.com.au/learn/login
------------	---

Email	instructor@govprocurement.com.au
-------	----------------------------------

Password	GPteach!Delivery26
----------	--------------------

Lands on	https://staging.govprocurement.com.au/learn/instructor
----------	---

Builds courses, uploads video, writes quizzes, schedules live sessions, and sees enrolments and progress.

This account owns the demo course in section 3.

Useful destinations:

- Teaching dashboard — <https://staging.govprocurement.com.au/learn/instructor>
- My courses (the course builder) — <https://staging.govprocurement.com.au/learn/instructor/courses>
- Live sessions — <https://staging.govprocurement.com.au/learn/instructor/live>
- Enrolments — <https://staging.govprocurement.com.au/learn/instructor/students>
- Student progress — <https://staging.govprocurement.com.au/learn/instructor/progress>

2.3 STUDENT

Sign in at	https://staging.govprocurement.com.au/learn/login
Email	student@govprocurement.com.au
Password	GPlearn!Delivery26
Lands on	https://staging.govprocurement.com.au/learn

Browses, buys, learns, sits quizzes and earns a certificate. This account owns nothing yet, so the purchase flow in section 4 can be walked from the very start.

Useful destinations:

- Dashboard — <https://staging.govprocurement.com.au/learn>
- Browse catalogue — <https://staging.govprocurement.com.au/learn/courses>
- My courses — <https://staging.govprocurement.com.au/learn/my-courses>
- Orders and receipts — <https://staging.govprocurement.com.au/learn/orders>
- Certificates — <https://staging.govprocurement.com.au/learn/certificates>
- Live sessions — <https://staging.govprocurement.com.au/learn/live>

2.4 A NOTE ON THE NAMES

These accounts are titled by role — *Site Administrator*, *Lead Instructor*, *Sample Student* — rather than given invented personal names. The instructor's name is published as the byline on the course page, and a made-up person credited with teaching government procurement is a claim the system should not make on anyone's behalf.

Rename them from **Profile** when real staff take them over: <https://staging.govprocurement.com.au/learn/profile>

3. The demo course

Built from the source material supplied, and published live on staging. It is assigned to the instructor account above, so signing in as that instructor shows the authoring side of the same course a student sees.

Title	Procurement Business Partnering: Ownership, Accountability and Value for Money
Public page	https://staging.govprocurement.com.au/courses/procurement-business-partnering-ownership-accountability-and-value-for-money
In-app page	https://staging.govprocurement.com.au/learn/courses/procurement-business-partnering-ownership-accountability-and-value-for-money
Price	\$249.00 AUD , inclusive of GST — \$226.36 net + \$22.64 GST
Level	Intermediate · 22 minutes of content
State	Published and open for enrolment
Instructor	Lead Instructor (<i>reassigned from the Azka test account</i>)
Also includes	6 learning outcomes, 2 prerequisites, 4 "what's included" points, and a certificate of completion

3.1 STRUCTURE

Module 1 — Ownership and Accountability

LESSON	TYPE	DETAIL
Lecture: Ownership and Accountability	Video	1 min
Lecture Quiz: Ownership and Accountability	Quiz	3 questions · 67% to pass

Module 2 — Value for Money

LESSON	TYPE	DETAIL
Lecture: Value for Money	Video	1 min
Lecture Quiz: Value for Money	Quiz	3 questions · 67% to pass

⚠ The two lecture videos are placeholders. They are one-minute clips uploaded during testing, not the real lectures. Everything around them — playback, progress tracking, the quiz gate, the certificate — works on them, but the teaching content still has to be recorded and swapped in.

3.2 BUNDLE

A bundle named **Course Bundles** is also published, at **\$300.00**, containing this course (\$249) and *Introduction to Government Procurement* (\$100) — a \$49 saving. It appears in the catalogue and can be bought in one transaction, which is worth testing separately from a single-course purchase.

Catalogue: <https://staging.govprocurement.com.au/learn/courses>

4. What to walk through

In this order. Each step depends on the one before it, and together they cover the whole path a paying learner takes.

#	STEP	WHAT SHOULD HAPPEN
1	Browse as a visitor — https://staging.govprocurement.com.au/learn/courses	Courses <i>and</i> the bundle are both listed, with prices marked inclusive of GST.
2	Click a course while signed out	You are sent to sign-in, and after signing in you land on that course — not dumped on the dashboard.
3	Buy the course as the student	Use test card <code>4242 4242 4242 4242</code> , any future expiry, any CVC, any postcode. Payments are in test mode, so no money moves.
4	Check the receipt — https://staging.govprocurement.com.au/learn/orders	Shows the reference, \$249.00 total, and GST of \$22.64 broken out as inclusive.
5	Watch a lecture	Progress advances and survives a page reload.
6	Sit a quiz and fail it deliberately	Answer one of three correctly. It refuses the pass at 67% and lets you retake.
7	Finish the course — https://staging.govprocurement.com.au/learn/certificates	Both quizzes passed unlocks a downloadable certificate.
8	Sign in as the instructor — https://staging.govprocurement.com.au/learn/instructor/courses	The course appears under My Courses with the enrolment and the student's progress visible.
9	Schedule a live session — https://staging.govprocurement.com.au/learn/instructor/live	Creating one generates a Zoom meeting. The student's Join button stays disabled until 15 minutes before the start — or the moment the instructor opens the room.
10	Sign in as the administrator — https://staging.govprocurement.com.au/admin	Course approvals, users and orders are all reachable from the CMS.

5. Before this goes to production

Verified on 28 August 2026. None of these stop staging testing; all of them stop a real customer transacting safely.

5.1 BLOCKERS

Payments are in Stripe test mode. The live environment reports `mode: test`. Real cards are not charged and no money is collected. Live keys must replace the test keys before launch.

The default administrator password still works. The seeded account `admin@example.com` still accepts its shipped default password. It should be disabled or have its password rotated — anyone who has seen the

codebase can sign in as a super administrator.

No ABN on invoices, and placeholder legal text. A tax invoice for a GST-inclusive sale must carry the supplier's ABN. The privacy policy and terms are still placeholder stubs of a few lines each.

5.2 STILL NEEDED

- **Outbound email.** No SMTP credentials are configured, so password resets, receipts and enrolment confirmations cannot be sent. Accounts currently work by password only.
- **Real lecture video.** Both lectures in the demo course are placeholder clips — see 3.1.
- **Clear test data from the production database.** Duplicate courses, probe accounts and abandoned orders from development are still present, and should be removed before the catalogue is shown to customers.

5.3 CONFIRMED WORKING

Tested on 28 August 2026 and passing:

- GST arithmetic — inclusive, checked exhaustively across every cent from \$0 to \$1,000; `net + GST` equals the total in every case.
- Purchase through to enrolment, including bundles — every paid order on record granted exactly the courses it should have.
- Webhook signature enforcement (unsigned, wrong-secret and tampered payloads are all rejected) and replay safety — a repeated payment event does not double-grant.
- The live-session join gate, across all twelve window boundaries, including a host starting early and cancelled sessions.
- Zoom provisioning — reports ready on the live environment.

5.4 EXPLICITLY OUT OF SCOPE

Single sign-on, memberships, coupons, and affiliate tracking were placed out of scope for this delivery and are not built.

Government Procurement — staging delivery set, prepared 28 August 2026 for CAL-GP-2026-SCOPE-004. Credentials in this document are live on staging and should be rotated after handover.
